

onePRO.45

It is no coincidence that, we chose a .45 ACP caliber for the development of this pistol.

This is because the .45 ACP FMJ standard caliber fulfills all the fundamental requirements needed for a self-defense cartridge. This choice provided all the basic prerequisites needed for the success of the development.

The robust steel construction of the weapon coupled with its ergonomic design ensures stability and ease of handling at all times even under rapid-fire conditions.

With the development of the interface between the user and the weapon, we aimed at and finally realized the optimum in ergonomic design.

From the beginning, it was clear that we wanted to build a .45 caliber weapon with a magazine capacity, which would put all others in the shade. However, it was equally clear that this had to be accomplished in a pistol of a size, which would ensure that all potential users would find the weapon easy to manage and would retain full control at all times. In this context, the design of the pistol butt became a matter of prime importance as it had match hands of all sizes, large and small.

These targets were achieved by fitting the one PRO.45 with a double row magazine with a capacity of 10 cartridges a butt hardly wider than that of a 9 mm pistol.

It is clear that in use, the first shot can be of decisive importance. The angle of the pistol butt has been carefully chosen allow the user to register his intended target quickly and deliver the snap shot with the greatest possible accuracy. The characteristics of the double-action trigger with a trigger pressure of 2.2 kg, ensure that, this pistol provides rapid readiness to fire coupled with maximum security.

One Pro .45 Standard

Caliber:	.45 ACP
Capacity:	10 Rounds
Length:	6.9"
Height:	5.8"
Width:	1.3"
Barrel length:	5.9"
Weight unloaded:	40.5 oz
Weight loadad:	48.0 oz
Trigger pull (DA):	4.8 lb
Trigger pull (SA):	2.2 lb

We offer the standard exemplar in following designs:

One Pro .45 Black

One Pro .45 BiColor

One Pro .45 Black/Gray

All exemplars will be delivered with following shipments:

- Weaponbag of plastic
- Handgun
- Reserve-Magazine 16 Rounds
- Cleaning utensils
- Manual

One Pro .45 Gray in bag

One Pro .45 Black in bag

onePRO 9

The decision to develop the one PRO 9 weapon arose from the obvious market for a compact self-defense pistol having a caliber of sufficient size to make it an effective weapon. As the one PRO 9 proves, the development of a large caliber compact pistol does not need to be beset by any compromise. This pistol represents the optimum solution for such a weapon, easy to carry, but providing high firepower with safe and reliable operation.

Weight considerations led to the choice of aluminum as the material for the pistol butt. Particularly, for a large caliber weapon, its dead weight of decisive importance.

A pistol that is too light tends to get out of control particularly under rapid-fire conditions.

Our choice of aluminum together with ideal form of the pistol butt ensures that the user retains control over the weapon under all conditions. This, in itself is a decisive advantage and not only in critical situations.

Every component, which is subject to stress, is manufactured from high quality, heat-treated steel. In this regard, special mention must be made of the rotation-lock of the breech mechanism.

As with the One Pro .45, we paid the greatest attention to the snap-shooting characteristics of the One Pro 9.

The angle of the pistol butt was carefully chosen allowing the user to register his intended target quickly and deliver the snap shot with the greatest possible accuracy.

The characteristics of the double-action trigger with a trigger pressure of 2.2 kg, ensure that, this pistol combines rapid readiness to fire, coupled with maximum security and reliability.

One Pro 9 Standard

Caliber:	9 Para
Capacity:	11 Rounds
Length:	6.1"
Height:	4.7"
Width:	1.3"
Line of sight:	4.5"
Weight unloaded:	25.4 oz (26 oz)
Weight loaded:	30.2 oz (33 oz)
Trigger pull (DA):	4.8 lb
Trigger pull (SA):	2.2 lb

Barrel: polygonal barrelprofile rotary locked

We offer the standard exemplar in following designs:

One Pro 9 BiColor Alu

One Pro 9 Black Alu

One Pro 9 Gray

All exemplars will be delivered with following shipments:

- Weaponbag of plastic
- Handgun
- Reserve-Magazine 16 Rounds
- Cleaning utensils
- Manual
- Grip extension

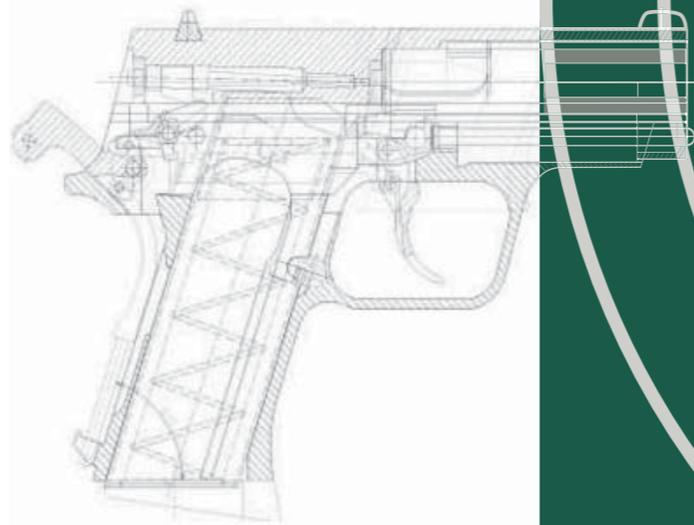

One Pro 9 Black in bag

One Pro 9 Gray in bag

ASAI's company policy is – high quality pistols with a swiss tradition of excellence.

DOUBLE-ACTION PISTOLS

The more than 100-year long history of the semi-automatic pistol has seen its performance improved by the continual introduction of many excellent individual features. Following our principle of offering our customers carefully engineered, practice-orientated products we place great emphasis on precision and accuracy. This applies from the earliest development stages through and particularly to all production processes. From the drawing board to the final product, we keep strictly to all those procedures which ensure the highest quality of our products and which have their roots in the long Swiss tradition of precision weapon production. We work continually to make proven procedures even better.

This philosophy binds us to our obligation to supplying products, which in regard to quality, durability and accuracy leave no wish unfulfilled.

The high degree of quality, precision and reliability demanded of modern semi-automatic pistols requires the application, from A to Z of innovative but carefully analyzed procedures. This is the demanding challenge that we set ourselves.

one engineered

FOR THE MOST DEMANDING APPLICATIONS

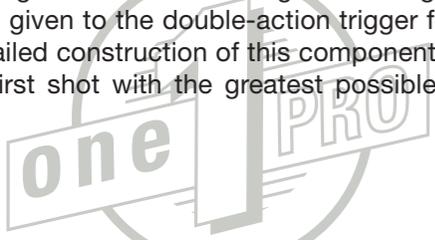

The foundation of our range of pistols lies in the application of well-proven traditional materials worked by the most modern machines. Each

and every component, large or small is manufactured with the same care and accuracy and is thoroughly checked and tested before final assembly. All of

our products are subjected to endurance shooting tests and the most stringent routine material and functional tests to ensure that you receive a flawless, reliable and safe product.

All pistols of our production are distinguished by their high accuracy, by their ease of handling, particularly under rapid-fire conditions and their ergonomic design. Further,

in contrast to conventional barrels the special polygon form of the ASAI one PRO 9 has no sharp profiles. This design substantially improves the seal between the projectile and the internal surface of the barrel, resulting in higher bullet velocity and greater energy. It also reduces abrasion of the barrel internal surface giving all ASAI weapons an exceptionally long life. Not least amongst the design details, special attention has been given to the double-action trigger featured in all our weapons. The detailed construction of this component ensures that the user can fire his first shot with the greatest possible confidence and accuracy.
